

JOURNAL OF NON-EQUILIBRIUM THERMODYNAMICS

GENERAL INDEX · VOLUME 36 · 2011

EDITOR-IN-CHIEF

Jürgen U. Keller, Siegen

EDITORS

Efstathios E. Michaelides, San Antonio

Wolfgang Muschik, Berlin

EDITORIAL ADVISORY BOARD

Bjarne Andresen, Copenhagen

Adrian Bejan, Durham

Dieter Brüggemann, Bayreuth

Rainer Buchholz, Erlangen

Friedrich Dinkelacker, Hannover

Duong D. Do, Brisbane

Leopoldo S. García-Colín, Iztapalapa

Manfred Groll, Stuttgart

Joachim Gross, Stuttgart

Karl-Heinz Hoffmann, Chemnitz

Serafim Kalliadasis, London

Signe Kjelstrup, Trondheim

Georgy Lebon, Liège

Gérard A. Maugin, Paris

Christina Papenfuss, Berlin

Robert B. Raffa, Philadelphia

Miguel Rubi, Barcelona

Stephan Scholl, Braunschweig

Holger Stark, Berlin

Annie Steinchen, Marseille

Urs von Stockar, Lausanne

Jozsef Verhás, Budapest

Roland Winter, Dortmund

Muhammad H. Zaman, Austin

HONORARY BOARD

Boye Ahlborn, Vancouver

Dick Bedeaux, Leiden

Ronald Fox, Atlanta

Natalya Kizilova, Kharkov

Wolfgang Kollmann, Davis

Jacques Ricard, Paris

Stanislaw Sieniutycz, Warsaw

Manuel G. Velarde, Madrid

DE GRUYTER

Contents of Volume 36 (2011)

ORIGINAL PAPERS

- M. Mottahedin, F. Varaminian, K. Mafakheri*
Modeling of methane and ethane hydrate formation kinetics based on non-equilibrium thermodynamics 3
- A. Abbasi, M. Z. Saghir, M. Kawaji*
Evaluation of the activation energy of viscous flow for a binary mixture in order to estimate the thermodiffusion coefficient 23
- D. Sands, J. Dunning-Davies*
Thermal damping in the compound piston 41
- A. P. Gerasev*
Variational principles in irreversible thermodynamics with application to combustion waves 55
- A. M. Abourabia, T. Z. A. Wahid*
Solution of the Krook kinetic equation model and non-equilibrium thermodynamics of a rarefied gas affected by a non-linear thermal radiation field 75
- L. Chen, K. Ma, F. Sun*
Optimal expansion of a heated working fluid for maximum work output with time-dependent heat conductance and generalized radiative heat transfer law 99
- J. M. G. Vilar, J. M. Rubi*
Work-Hamiltonian connection for anisoparametric processes in manipulated microsystems 123
- R. Feistel*
Entropy Flux and Entropy Production of Stationary Black-Body Radiation 131
- R. Deng-Fang, Y. Xiao-Feng, Y.-R. Li, S.-Y. Wu*
Entropy generation analysis of parallel and counter-flow three-fluid heat exchangers with three thermal communications 141
- L. Chen, Z. Ding, F. Sun*
Optimum performance analysis of Feynman's engine as cold and hot ratchets 155
- L. Ardizzone, G. Gaeta, M. S. Mongiovi*
Propagation of fourth sound in turbulent superfluids via extended thermodynamics 179
- L. Hadji*
Modeling convection onset in colloidal suspensions of particles 203

<i>V. Moratto, L. S. García-Colín</i> Relaxation time for the temperature in a dilute binary mixture from classical kinetic theory	229
<i>S. Srinivasan, M. Z. Saghir</i> Thermodiffusion in ternary hydrocarbon mixtures. Part 1: n-dodecane/isobutylbenzene/tetralin	243
<i>A. Abbasi, M. Z. Saghir, M. Kawaji</i> An improved thermodiffusion model for ternary mixtures using Fujita's free volume theory	259
<i>D. I. Leonard, D. M. Packwood, L. F. Phillips</i> Non-equilibrium thermodynamics of the gas-liquid interface	273
<i>V.A. Cimmelli</i> Weakly nonlocal thermodynamics of anisotropic rigid heat conductors revisited	285
<i>S. Mack, M. A. Hussein, T. Becker</i> Investigation of heat transfer in cereal-based foam from a micro-scale perspective using the lattice Boltzmann method	311
<i>L. A. Belfiore, F. Z. Volpato, A. T. Paulino, C. J. Belfiore</i> Dynamic shear-stress-enhanced rates of nutrient consumption in gas-liquid semi-continuous-flow suspensions	337
<i>D. Jou, V.A. Cimmelli, A. Sellitto</i> Dynamical temperature and renormalized flux variable in extended thermodynamics of rigid heat conductors	373
<i>T. Ke, L. Xiaogang, L. Tian, J. Tao</i> Study on self-excited oscillation in a thermoacoustic engine with Glansdorff-Prigogine stability criterion	393

Analytical Subject Index Volume 36 (2011)

- Activation energy of viscous flows 23
Anisotropic rigid heat conductor 285
- Binary gas mixtures 229
Black body radiation 131
Boltzmann lattice method 311
Boltzmann's kinetic equation 75
Boltzmann's transport equation 229
- Cell proliferation 337
Cereal based foams 311
Chapman-Enskog-expansion 229
CO₂ exchange air-water 273
Combustion wave 55
Compound piston 41
Contact temperature 131
Convection in liquids 203
- Dielectric crystals 373
Dynamical non-equilibrium
temperature 373
- Entropy generation in heat exchangers 141
Entropy production 131
Entropy production minimization 55
Ethane hydrates 3
Evaporation-condensation mechanism 311
Expansion process of working fluids 99
Extended Coleman-Noll procedure 285
Extended thermodynamics 179
Eyring theory of viscosity 23
- Feynman's ratchets engine 155
Finite time thermodynamics 99, 155
Fluctuation-dissipation theorem 337
Foams 311
Fourth sound 179
Free volume theory 259
- Gas-liquid-interface 273
Gas hydrates 3
Gas-radiation interaction 75
Glansdorff-Prigogine stability
criterion 393
- Hamiltonian of Microsystems 123
Heat exchanger 141
Heat transfer 311
Hydrocarbon mixtures 23, 243
- Ideal gas 41
Isoparametric statistical ensembles 123
- ISS onboard thermodiffusion
experiments 243
Kinetics of hydrate formation 3
- Laminar combustion 55
Liquid suspensions 203
- Mammalian cells 337
Manipulated Microsystems 123
Methane hydrates 3
Microsystems 123
- Nanoparticles 203
Non-local thermodynamics 285
Nonlinear heat transfer equation 373
Nutrient consumption 337
- Onsager cell 273
Onsager heat of transport 273
- PC SAFT – equation of state 259
Performance of ratchets engines 155
Radiative heat exchange 131
Radiative heat transfer 99
Rarefied gas 75

- Renormalized flux variable 373
Rigid heat conductors 373
- Second Law of thermodynamics 285
Self-excited oscillation 393
Semi-continuous-flow suspensions 337
Soret coefficients of ternary mixtures 243
Soret driven convection 203
Stability analysis 393
Stress-sensitive kinetics 337
Superfluids 179
- Temperature relaxation processes 229
Thermal conduction 41
Thermal damping 41
- Thermal radiation fields 75
Thermoacoustic engine 393
Thermodiffusion 23
Thermodiffusion in ternary
mixtures 243, 259
Thermodiffusion model 259
Three-fluid heat exchanger 141
Traveling waves 55
Turbulent superfluids 179

Index of Authors

- Abbasi, A. 23, 259
Abourabia, A.M. 75
Ardizzone, L. 179
